 WILDLIFE RESOURCES DIVISION

Project funding provided in part by the Georgia Department of Natural Resources' Wildlife Viewing Grants Program, in accordance with the State Wildlife Action Plan (SWAP). Georgia's SWAP is a comprehensive strategy to conserve native species and the habitats they need before these animals, plants, and places become more rare and costly to conserve or restore.

Species denoted as 'endemic' ● are found only in the Apalachicola-Chattahoochee-Flint (ACF) River Basin. Threatened species ▲ are identified by Endangered Species Act (ESA) designation. Species of Greatest Conservation Need ◆ are included in the SWAP.
