The Jones Center at Ichauway does not take credit for any of the images used in the “Fishes of the Flint River Basin” poster. All images were found through resources at museums, universities, and specialists. Please see the following list for the associated image citations.

We compiled this list to the best of our abilities from credible sources listed below, but acknowledge that species designations, taxonomy, and understood ranges are constantly evolving. We welcome any feedback or constructive suggestions. We greatly appreciate the valuable input and critiques from Dr. Brett Albanese, Byson Hilburn, Dr. Mary Freeman, Travis Ingram, and Dr. Adam Kaeser who have all spent numerous years studying the fish species of the Flint River.

All scientific and common names are listed according to the American Fisheries Society’s 2023 Common and Scientific Names of Fishes from the United States, Canada, and Mexico, 8th edition.
